

What is the Motion Appliance?

Utilizing the latest in advanced orthodontic technology, the *Motion* Appliance ensures a fast, effective, and aesthetic first phase treatment. Plus, by jumpstarting your orthodontic care with the *Motion* Appliance, your overall treatment time is reduced, which means less time in braces.

Normal treatment time for the appliance is 3 to 5 months, but it can differ depending on your orthodontic case. When the desired movement is reached, your orthodontist will remove the appliance and will place your braces or aligners to complete your orthodontic care.

CARRIERE®
CONFIDENCE. FOR LIFE.™

A beautiful smile enhances your quality of life and is an investment that lasts a lifetime. Let us and your orthodontic professional show you how easy it is to obtain your desired smile with the *Motion* Appliance.

With the **Carriere® Motion™ Appliance**, achieving a beautiful smile in the shortest possible time has never been so easy. This sleek, comfortable Class II correction appliance was designed with you, the patient, in mind.

Motion

CLASS II
CORRECTION APPLIANCE

Benefits for You!

Shorter Treatment Time

The appliance is placed before your braces are put into place for faster movement of teeth and less time in braces.

Elastics Early On

Elastics are worn at the beginning of treatment when you are excited to start orthodontic treatment, rather than at the end when you are ready for your braces to come off.

Aesthetically Pleasing

Unique design makes the appliance hardly noticeable in your mouth.

Normal Speech

The quality of your speech is not affected unlike when wearing other traditional orthodontic appliances.

No Facial Appliance Needed

Avoid the bulky feeling from alternative solutions which are more invasive, such as headgear, and worn outside the mouth.

Sleek, Low-Profile Design

The low profile and smooth surface makes it comfortable to wear; there is no poking of the lips/cheeks.

Good Oral Hygiene

The appliance is easy to clean, plus it is also easy to brush your teeth to keep your mouth free of debris, resulting in good oral hygiene.

Before Braces

The patient-friendly Motion Appliance is bonded to your teeth in the first phase of orthodontic treatment.

Bonded Day 1

Moving your teeth faster and more aesthetically than other traditional Class II correction appliances.

After Braces 13 Months*

So, with less time in braces and less discomfort, you will have the beautiful smile you've always wanted in no time.

*Treatment time will differ depending on your orthodontic needs.
